Hello Year 12 media pupils!

The bridging work I am setting is really easy and fun! But most importantly really useful for Year 12 and units you will study.

I would like you to watch 3 movies of your choice (on a computer) and simply take screen shots throughout, once watched, focussing on camera shots you found interesting.

I would then like you to explain why you think the camera shot was used in the film at that particular point in the story line and also explain why you liked the camera shot.

And that is it! Believe me it will immensely support you in the opening weeks of the course, giving you examples to explore and use in the assignments that follow.

Regards,

Mr Baga.
