

Dear Parents/Carers,

Year 11 GCSE Science Live Event - Monday 5th February 2024

The Science Faculty are pleased to announce that we have provisionally booked tickets for **GCSE Science Live** at the Dominion Theatre, London. This is a fantastic opportunity to hear from Principal Examiners from the different GCSE boards discussing crucial exam techniques and get tips and advice on how to secure the top marks in their science GCSE papers. Students will be shown examples of high and low scoring answers and hear explanations of what their examiners are looking for in order to achieve the highest levels.

Following the morning session from the examiners, students will then have the chance to hear world-renowned scientists discuss their work and the impact it has on society. Speakers will include:

- Lord Robert Winston, Professor of Science & Society and Imperial College, London
- Prof Andrea Sella, Professor of inorganic chemistry at UCL
- Dr Maggie Aderin-Pocock, space scientist, lecturer and presenter of 'The Sky at Night'.

Further information can be seen at https://sciencelive.org.uk/gcse/event_categories/london2-2/.

We will travel by coach, leaving school at 8:30am and returning by 4:30pm, although timings are approximate, depending on traffic.

To express your interest in this trip please complete this google form by Friday 6th October. I will send out a second letter with the total cost for the trip once we know how many students would like to attend.
