

### **Measure and Assess Impact of Careers Programme**

We measure and assess the impact of its careers programme termly with our SEMLEP advisor using Compass+ to gauge the strengths of the careers programme against other schools in the borough and beyond.

We collect intended and actual destination data to analyse where our students are moving on to so we can better tailor our programme for future years.

We are able to track individual student's Unifrog profile so their tutors, academic mentors and teachers can see their interests and better support them.

We use 4YP careers advisors to offer impartial careers advice to KS4 and KS5 students. These advisors feed back to the school where students may need more support.
