

Year 5-12 Remote Learning Plan April 2024

We want to keep any learning disruption to a minimum and would like to ensure there is consistency of expectation of pupils across subjects and year groups.

Pupils should follow these guidelines to access learning:

1. Follow the normal timetable of lessons for each day of the closure.
2. Work will be set on google classroom, no later than the start time of the lesson. Lessons are not 'live', however pupils will be able to interact with their class teachers via email during their allocated lesson time to ask any questions they may have about the work set.
3. The work may consist of google slides, instructions for pupils to follow and any associated worksheets or instructions on how to complete the work set.
4. Once the pupils have accessed the lesson content and read the materials provided by their teachers they are expected to complete the work for the remainder of the lesson time.
5. Pupils should check that they are added to their subject google classroom. Class teachers can be emailed and are able to add pupils to a google classroom if required.
6. Yr10 exams - These pupils will NOT be sitting exams during the closure days and will be set work via google classroom in line with other year groups.
