# Choosing the right **place** for you

- **Style** – from traditional, with a focus on subject-based courses and research, to modern universities/colleges, with a greater focus on vocational courses.
- **Location** – some are in large cities, others in small towns, by the coast or in the countryside – it's all a major influence on the environment and lifestyle.
- **Size** – larger universities can have more than 20,000 students, whereas some of the smallest have only a few thousand.
- **Culture and facilities** – influenced by a range of factors, including the diversity of students who attend.
- **What graduates do** – all universities collect destination statistics; it can be useful to find out what jobs or further study students go on to.
- **Tuition fees** – can vary between universities and colleges; check if there are scholarships or bursaries available.
- **Living costs** – accommodation, transport, and food can vary enormously.

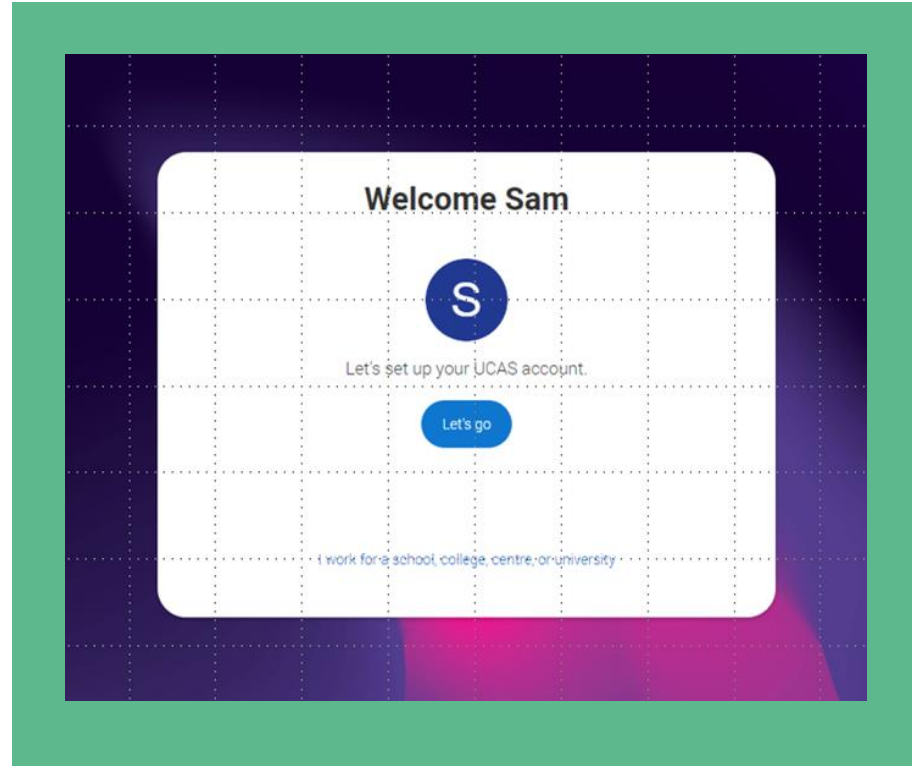

# Choosing the right **course** for you

- What does the course cover?
- Courses with the same title may be very different.
- Look carefully at the core course content, and the range of optional studies/modules available.
- Which modules are the most interesting and relevant to your career aspirations?
- See if the course or university/college offers any internship, placement, or study abroad opportunities.
- How is the course taught – structured teaching, or more independent research?  
How many lectures are there, and how much group work will be done in seminars?
- How is the course assessed?
